

GEAR-BOX LIFT

MODEL 1005

Swedish-made high-lifting gear-box lift for dismantle/set up of gear-boxes, rear-axle gears and other heavy components on buses and trucks. The comfortable method of working.

GEAR-BOX LIFT

model 1005

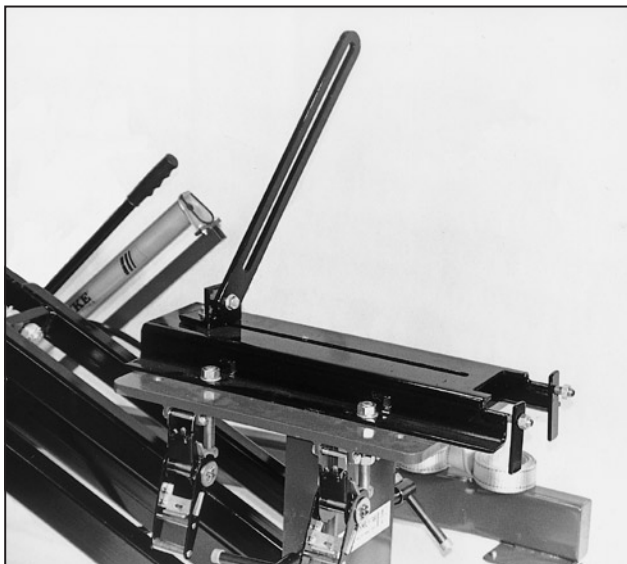

Low weight and large solid swiveling wheels, of which the two wheels in front are possible to lock in straight forward position, makes the lift very easy to move. One of the rear wheels is equipped with brake.

Steady even with load in the highest position.

Equipped with an effective hydraulic pump driven by hand, which can be moved to optional side.

The fixing device plate of the lift fits all types and makes of gear-boxes. The attachment has to be done by 2 pcs of strap and the gear-box is resting against 4 pcs of adjustable bolts.

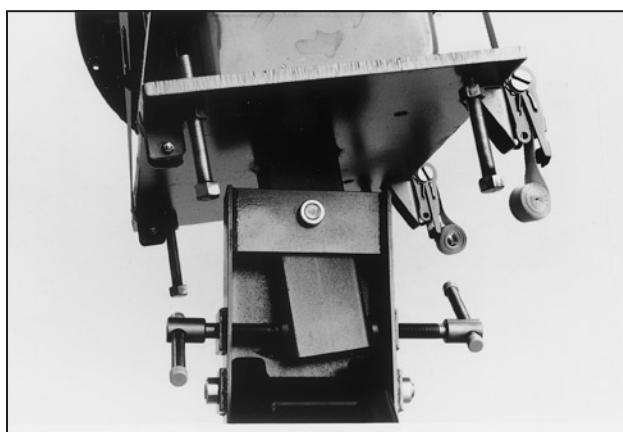

Stepless tipping of the fixing device plate lengthwise by catch and side-wise by 2 pcs off attachment screws.

The rear-axle-gear holder is mounted on the top of the gear-box lifting device plate.

Stepless tipping of the fixing device plate length-wise by catch.

Stepless tipping of the fixing device plate side-wise by 2 pcs of attachment screws.

Accessories:

Rear-axle-gear holder is mounted on the top of the gear-box lift fixing device plate.
