

1/2" Cordless impact wrench 1200Nm A63

1/2" A63 cordless impact wrench - set in a case.

Description

A63 cordless impact wrench.

Cordless impact wrench. Equipped with the most popular and universal anvil size 1/2".

The maximum torque of 1200Nm allows you to effectively unscrew even heavily seized screws.

The wrench is perfect for working in the conditions of a typical car workshop or tire change service. The battery with a capacity of up to 6Ah allows for free, all-day use of the device. The charge level can be easily checked directly from the battery itself. The fast charger included in the set allows you to charge the battery from 0 to 100% in about 2.5 hours.

The heart of the device is a failure-free and failure-resistant brushless motor, and an ergonomic body made of high-quality plastic is responsible for a comfortable grip and optimal balance. The body has been designed to reduce vibrations and shocks during operation.

If you value working comfort, convenience of use, high power and wide range of applications - A63 is the equipment for you.

The EXPPXA kit includes:

Impact wrench A63;

Battery 21V / 6 Ah (2 pieces);

Quick charger with security chip;

Suitcase;

Socket set for alu wheels (17/19/21 mm);

The most important functions of INVENTO A63:

max. loosening torque: 1200 Nm;

3-step tightening mode adjustment (50-80-100%);

The system is powered by a failure-free brushless motor;

2400 rpm;

LED lamp illuminating the working area;

2 operating modes (tightening/loosening) regulated by a simple switch.
